Attn: Investigative News Desks / Executive Cybersecurity Directorate / En Banc Secretariat

Dear Sirs/Madams,

For the immediate attention of your editors and directors: an extraordinary state of administrative paralysis has been documented on the public network.

In an active, docketed sovereign data showdown—**Case No. CID-CDO-2026-001 (Stow vs. Meta Platforms International Operations Philippines Inc.)**—the Defendant is currently on the precipice of executing an automated data destruction sequence on **June 7, 2026**.

While my enterprise mail infrastructure has established cryptographically perfect SMTP 250 OK Proof of Delivery handshakes across all regulatory and executive portals, the involved departments are sitting on their hands and watching.

Allowing a foreign technology monopoly's automated script to delete the core prosecution data during an active state litigation track crosses the line from technical negligence into an outright **Data Interference crime under Section 4(a)(3) of R.A. 10175**.

The daily, inaction-by-inaction ledger of this institutional failure is now streaming live at the head of the global public archive: [www.case001.org](http://www.case001.org).

Will the higher executive offices and international wire services allow automated corporate evasion to destroy human due process, or will an immediate data preservation mandate be enforced before the clock strikes zero?

Sincerely,

**Geoffrey Arthur Stow**
