Formal_Submission_of_Evidence_Case_CID-CDO-2026-001-FS.pdf (~290 KB) ▾

Dear NPC Complaints and Investigation Division (CID) Investigator,

In reference to active state tracking action **Case No. CID-CDO-2026-001** (Geoffrey Arthur Stow vs. Meta Platforms International Operations Philippines, Inc.), please find attached to this email a formal, signed **Evidentiary Manifestation and Status Advisory**.

This submission is formally entered into the active Fact-Finding record pursuant to my statutory rights under the Data Privacy Act of 2012. It details:

- Verified technical proof of physical service evasion and actual corporate notice via landlord channels.
- An explicit, narrowed evidentiary demand for automated decision-making and metadata logs under NPC Circular No. 2022-04.
- Explicit spoliation parameters under Section 34 of the Act regarding the manual litigation hold currently active on my database profile.

Please ensure this document is formally received, stamped, and attached to the main case folder for review by the Commission En Banc. The underlying digital evidence remains streaming live for public regulatory verification at the updated ledger: www.case001.org.

Respectfully submitted

Geoffrey Arthur Stow

Complainant / Data Subject

Case No. CID-CDO-2026-001

Live Case Records: www.case001.org

P.S. Please note for the formal record that real-time network propagation audits executed over the weekend confirm that Meta's backend engineering tier is actively altering my database visibility flags—re-propagating historical tags on third-party family posts—in a transparent attempt to manipulate the evidentiary footprint before this tribunal. I have deliberately refused to log into the platform to maintain the complete forensic purity of the underlying server logs for your division's subpoena.
