

ADVISORY TRANS-MISSION – NPC CASE NO. CID-CDO-2026-001 (STOW VS. META)

To [Menarco Development Corporation](#) 1 more... on 2026-06-04 20:49

 Details  Plain text

Attn: Corporate Governance Desk / Building Management Team (Menarco Development Corporation)

Dear Sirs/Madams,

I am forwarding the text below for your immediate information as a professional courtesy, following our previous correspondence regarding active state tracking action Case No. CID-CDO-2026-001.

As part of our commitment to transparency, we want to keep your management team apprised that local investigative tech desks are now actively looking into the upcoming June 7th evidence preservation threshold.

Because the underlying data index (UID: geoff.stow.96) is scheduled for automated deletion this weekend, we have shared our technical audit logs with media researchers.

We certainly would not want Menarco's premium commercial facilities or your building infrastructure to be inadvertently linked to a high-profile technology controversy, nor would we want this administrative matter to create an unexpected legal headache for your 32nd-floor tenant, Meta Country Director Jerry Jimenez Bongco.

We are sharing this tracking update in the hope that it helps your executive desk facilitate an immediate internal routing of the data preservation notice directly to Meta's local leadership, defusing the issue before automated data erasure occurs.

The running countdown clock and verified administrative files remain accessible for your review at: www.case001.org

Kind regards,

Geoffrey Arthur Stow

Attn: Tech & Investigative Desks,

We have entered the final 72-hour operational window before Meta's automated script permanently deletes the underlying logs under active sovereign review in Case No. CID-CDO-2026-001 (June 7th Deletion Threshold).

Allowing an un-halted corporate algorithm to execute a permanent data purge during an active state litigation track crosses the line from non-compliance into a definitive Data Interference crime under Section 4(a)(3) of R.A. 10175.

Because this occurs on Philippine soil under a docketed sovereign tracking number, this automated destruction of evidence is poised to cause a severe legal and regulatory headache for Meta Philippines Country Director Jerry Jimenez Bongco.

As the top local executive, Bongco's office cannot use a physical lobby blockade at Menarco Tower to shield local leadership from personal corporate accountability when a live data-destruction crime executes against UID: geoff.stow.96 on their network ledger on June 7th.

Our enterprise server logs suggests your tech desk has already downloaded our primary evidentiary bundles. If your newsroom intends to catch Meta's local leadership presiding over the permanent destruction of litigation evidence, your window for direct intervention and comment closes this weekend.

The live chronological countdown clock and scanned courier evasion profiles remain streaming at: www.case001.org

Available immediately for phone or video interviews.
