**Attn: Office of Corporate Governance / The Board of Directors
Menarco Development Corporation**

Dear Sirs/Madams,

Further to our previous electronic correspondence and your administrative confirmation regarding Meta Platforms' tenancy on your 32nd floor, please be advised that a dedicated international monitoring platform has been formally deployed to track this dispute.

The repository is now live on the public network at: www.case001.org

For total corporate transparency and to maintain a secure public record ahead of Meta AI's June 7, 2026 data deletion threshold, we have published the complete, sanitized case file. This includes our recognition by the state data regulator as the premier emergency data preservation action of the year (**Case No. CID-CDO-2026-001**).

The Landlord Audit (Annex I):

We have explicitly published the chronological J&T Express traffic logs to the website timeline. This document provides empirical proof that despite your digital invitations for communication, your ground-floor reception infrastructure physically and telephonically evaded twelve (12) distinct delivery attempts by professional logistics carriers across a four-day testing window.

As an international software managing director with a 50-year commercial legacy, I note that the disclosed board composition of this real estate development house includes prominent figures tied directly to the leadership of major national media and broadcasting networks.

It represents a significant operational risk when a premium corporate tower—managed by entities deeply rooted in the public media and communications sector—is documented running an uncontactable physical and telephonic blockade against official courier notifications.

The live countdown timer on case001.org will continue to monitor whether standard operational transparency is restored at your Menarco Tower reception lobby, or if the "Peter Pan Corporation" on your 32nd floor successfully uses your building's locked reception infrastructure to execute a permanent destruction of electronic evidence under active state review.

Sincerely,

Geoffrey Arthur Stow

Managing Director, Redberry Software (UK) Ltd.
