Attn: Office of Corporate Governance / Legal Operations
Menarco Development Corporation

Dear Sirs/Madams,
We write to update your administrative logs regarding the active data-privacy monitoring platform, currently live on the public network at **www.case001.org**. As documented on the public registry, this matter has been formally docketed by the sovereign data regulator as the premier emergency data preservation track of the year (**Case No. CID-CDO-2026-001**).

As an international software infrastructure firm with a 37-year commercial legacy, we highly respect Menarco's position as a premium commercial lessor. We presume that the disclosed board composition of this real estate development house includes prominent figures tied directly to the leadership of major national media and broadcasting networks.
Consequently, we identify a mutual operational interest in preserving standard compliance and service integrity within your BGC Menarco Tower facility.

The Two-Stage Operational Proposal:
To eliminate any ongoing reputational risk or administrative friction before the state's highest data privacy tribunal regarding the multi-carrier courier blockades documented at your reception lobby (Ref: Annex I), **we hereby formally invite Menarco Management to execute internal service as a neutral corporate lessor.**

- **The Condition:** If your legal or building operations department confirms its willingness to maintain standard building transparency, we will provide your desk with an encrypted, sanitized copy of the data preservation mandate.
- **The Execution:** Upon receipt of this secure packet, a Menarco building supervisor will execute internal routing by delivering the document directly to the office management of your 32nd-floor multinational tenant, securing a standard internal building acknowledgment receipt, copies of which you will make immediately available to the Complainant, Geoffrey Arthur Stow, via email address geoff.stow@redberry.com.

This professional intervention completely exonerates your ground-floor infrastructure from any ongoing narrative of tenant-evasion support, honors your public commitment to corporate governance, and provides a clean operational resolution to this matter.
We hold our public timeline documentation for a strict **72-hour review window** to allow your legal department sufficient time to ponder this structural exit prior to our upcoming international media updates. We await your operational confirmation before any file parameters are transmitted.

Sincerely,
Corporate Risk & Compliance Desk
Redberry Software (UK) Ltd.
